## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to a method for making a servo-patterned magnetic recording medium, classified in class 427, subclass 523.
- II. Claims 14-20, drawn to a servo-patterned magnetic recording medium, classified in class 428, subclass 692.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed could have been used to make another and materially different product, such as a servo patterned magnetic recording medium comprising a first **unpatterned** region of first higher values of coercivity and MrT, and a second patterned plurality of implanted regions of a second lower values of coercivity and MrT.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: ~~4773~~ 1762

4. During a telephone conversation with Aaron Weisstuch on 7/14/03 a provisional election was made with traverse to prosecute the invention of the method, claims 1-13. Affirmation of this election must be made by applicant in replying to this Office action. Claims 14-20 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102/ 35 USC § 103***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim1 is rejected under 35 U.S.C. 102(a) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Meyer et al. This reference discloses in the abstract and col. 9, lines 35-55 a method of forming servo tracks in a magnetic layer by ion implanting with O, N or Si ions. It is the examiner's opinion that the claimed difference in coercivity and Mrt would be inherent in the product resulting from the process of the reference. In addition, the presently claimed property of Hc and Mrt would obviously have been present once the reference product is provided. Note in re best, 195 USPQ at 433, footnote 4 (CCPA 1977) as to the providing of this rejection made above under 35USC 102.

### ***Claim Rejections - 35 USC § 103***

Art Unit: 1762

Claims 2-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Meyer et al for the same reasons as urged in the above paragraph. The limitations of these dependent claims are conventional and do not render these claims unobvious.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bernard D Pianalto whose telephone number is 703 308 2332. The examiner can normally be reached on 5:30-6:00 Mon-Wed.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Shrive P Beck can be reached on 703 308 2333. The fax phone numbers for the organization where this application or proceeding is assigned are 703 872 9310 for regular communications and 703 872 9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703 306 5665.
